

# BLUE GLACIER MANAGEMENT GROUP: A CUSTOMER-FOCUSED CYBERSECURITY COMPANY

The U.S. Department of Veterans Affairs (VA) Transformation Twenty-One Total Technology (T4) program is a five-year, indefinite delivery/indefinite quantity (IDIQ) multi-award task order contract that provides a total Information Technology (IT) Services Solution for the lifecycle of systems like program management and strategy planning, systems/software engineering, enterprise network, cybersecurity, operation and maintenance, and IT facilities.

## VA challenges

In a world that is more global and mobile every day, VA is working against many challenges. It must support more complex activities with greater precision and more predictable outcomes than ever before. It must figure out ways to deal with fewer resources, including growing budgetary strains and smaller staffs. And of course, it must do it all under increased public scrutiny.

To ease the pressure of some of those challenges, VA Major Initiatives seek to move VA's internal IT focus from vertical lines of business to a more holistic, cross-cutting approach. This transformation will keep the direct value to the Veteran front and center while managing the impact of planned improvements across the enterprise—transforming VA into a Veteran-centric, results-driven, forward-looking 21st century organization.

## How Blue Glacier can help

Blue Glacier offers program and project management services, specializing in information technology and cybersecurity that are tailored to the client's needs and expectations. Blue Glacier's experience in program design and deployment, scope management, and final delivery, has made us a "go to" provider of government cyber solutions.

Blue Glacier brings unique qualifications to help address client needs, and our employees have supported numerous departments and agencies, including the U.S. Department of Defense (DoD), U.S. Department of Homeland Security (DHS), U.S. Health and Human Services (HHS), VA, U.S. Department of the Treasury, U.S. National Institute of Standards and Technology (NIST), U.S.

Office of the Director of National Intelligence (ODNI), and U.S. Federal Communication Commission (FCC). We provide innovative, scalable, and individually tailored solutions to assist clients in advancing their cybersecurity mission. Notably, our team has supported DHS's United States Computer Emergency Readiness Team (US-CERT) since its establishment in 2003 and its employees serve in strategic roles for key national-level programs, including policy development for DHS, NIST, and other Federal agencies.

## What we deliver

We understand that developing cybersecurity operation teams is not a "one size fits all solution" and must be scaled to meet an organization's evolving mission requirements. Our staff maintains the expertise to support key aspects of the cybersecurity mission, including the following areas:

- **Cyber & Intel Operations** – Analysis, Incident Handling, Operational Planning, Digital Media Analysis (DMA)/ Malware, Intelligence Community (IC) Cyber Programs, Mitigation, Production and Coordination/Outreach
- **Infrastructure & Engineering** – Systems and Engineering, NOC/Network Management, Cloud Computing, Tool Development and Capability Analysis
- **System Assurance** – Certification and Accreditation (C&A), Pen Testing, Security Test and Evaluation (ST&E), Risk Assessments and Vulnerability Analysis
- **Programs & Plans** – Strategic Planning, Continuity Planning, Configuration Management, Quality Assurance, Business Planning and Operations and Contract Management

## About HP

HP is a leading global technology services provider, delivering business solutions to its customers. HP delivers a broad portfolio of information technology and business process outsourcing services to customers in the manufacturing, financial services, healthcare, communications, energy, transportation, and consumer and retail industries, and to governments around the world.

## About Blue Glacier

Blue Glacier Management Group Inc. (Blue Glacier) focuses on bringing innovative cybersecurity solutions to clients in the Federal government and private sector. Blue Glacier has provided national level policy development and program support to DHS, NIST, and other Federal agencies on cybersecurity, IT, and IT-related issues. Our subject matter experts take pride in delivering successful results to our clients and living up to our promises. Our unique experience contributes to an understanding of lessons learned in building operations centers and network security architectures that promote a "one size does not fit all" solution.

As a small, veteran-owned business with big business expertise Blue Glacier brings a wealth of experience developing and managing cyber operations and security programs to large organizations across the Federal government.

## What you can achieve

Blue Glacier helps to build and manage Strategic Programs. We successfully work with public and private Chief Information Officers and Chief Information Security Officers to develop, maintain and enhance operational and compliance programs. Our experience includes:

- Cyber Operations Center lead for Critical Infrastructure Sector's Trusted Partner Information Sharing and Joint Analysis
- Program Management, Collaboration, and Complex Public-Private Incident Response and Remediation Services
- Computer Security Incident Response, Planning, and Process Development
- Trusted Internet Connection (TIC) Initiative Support

- Network Security Monitoring Capability Assessment and Implementation Strategy
- Cyber Security Strategy Program Plan Development
- Customer Systems Engineering, Software Development, and Data Integration Support
- 24x7 Operations across Incident Handling, Analysis, Detection and Production
- Strategic Plan, Program Plan, CONOP and SOP Development
- National Cyber Protection System (Einstein Program) Lifecycle Management
